MH

Summary

To attain a good position in the organization I work, where my presence is felt and my contribution is a vital importance to the growth of the company and my career.

Experience

Full Stack Web Development

CodeB • Mumbai, Maharashtra

09/2022 - 07/2024

- Led development efforts on the iCall project, a customer support chat website utilizing socket server technology. Implemented socket server functionality to facilitate real-time communication between users and support agents
 - Developed the marketing (agency) feature backend for the Chingari platform using Node.js, enabling targeted promotional campaigns and analytics tracking. Designed and implemented scalable and efficient backend systems to support marketing initiatives, ensuring high performance and reliability
 - Worked in blockchain transaction functionality on the backend node.js for the Gari component of Chingari, utilizing Aptos and Solana blockchains. Managed cross-chain transactions, ensuring seamless interoperability between Aptos and Solana blockchains for efficient asset transfer
 - Spearheaded the development of the SeleC project, an application designed for SeleC users to visualize device parameters obtained from IoT Core. Utilized AWS Lambda functions to retrieve and process data from IoT Core, ensuring seamless integration and real-time updates of device parameters
 - Developed an admin panel for the NSPCL Government Ex-Employee Portal using the Horizon UI template for a modern and responsive frontend, PHP Laravel for robust backend functionality, and SQL Server for reliable database management.
-

Skills

HTML5, CSS3, JavaScript, Node.js, ReactJS, React Native, MongoDB, MySQL, Bootstrap, AWS
